

The People You Know. The Products You Trust.

QUALITY POLICY

Schwarze Industries Australia (SIA) is committed to being the market leader in the sales and supply of quality street sweepers. To achieve this vision, the SIA Quality Management System (QMS) will provide the framework for the organisation to meet customer requirements whilst providing SIA with a well-defined approach to the business.

The key objective of the Quality Management System is to provide quality street sweepers and after sales service that is consistent with the requirements and expectations of our customers. To support this SIA will;

- Develop and maintain a skilled workforce through recruitment and training
- Encourage employee participation in continual improvement within day to day operations
- SIA's QMS will be formally recognised and certified to the AS/NZS ISO9001:2008 Quality Management Systems
- Actively meet Schwarze business objectives

Appropriate metrics will be determined and reported on at the regular management reviews to ensure SIA continues to be committed to the vision of the organisation and the continual improvement of the Quality Management System. As part of this continual improvement process, the objectives will be reviewed on an annual basis along with this Quality Policy by the senior management team of SIA.

SIA's senior management will support and drive this Quality Policy and associated objectives to ensure that SIA achieves its vision. Copies of this policy will be displayed and made available on the company's web site.

Andrew Cockerill
Managing Director
